## Content

- 1 transceiver
- 1 antenna
- 1 battery pack
- 1 belt clip
- · 1 fast desktop charger
- User manual

If any items are missing, contact your dealer.

## **Maintenance**

Your Two Way Radio is an electronic product of exact design and should be treated with care .The suggestions below will help you to fulfill any warranty obligations and to enjoy this product for many years.

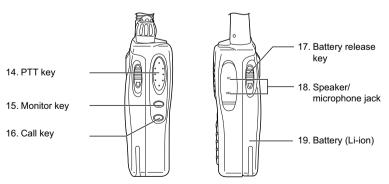

- Do not attempt to open the unit. Non-expert handling of the unit may damage it.
- When using regulated power supply, take notice of power voltage that must be between 6V and 8V to avoid damaging the unit.
- Do not store the Radio under the sunshine or in hot areas.
- High temperatures can shorten the life of electronic devices, and warp or melt certain plastics.
- Do not store the radio in dusty, dirty areas
- Keep the Radio dry. Rainwater or damp will corrode electronic circuits.
- If it appears that the Radio diffuses peculiar smell or smoke, please shut off its power immediately and take off the charger or battery from the Radio.
- Do not transmit without antenna.

## **Features**

- 4W Output power (VHF/UHF)
- 128 groups of memory channels
- 25KHz/12.5KHz Channel spacing compatible
- Automatic Numbering Identification (ANI) code
- Built-in VOX function
- All channels scan and priority channel scan
- Scrambler
- LCD backlight adjustable in 3 different colours
- Emergency alarm
- 50 CTCSS and 104 DCS Normal/Inverted selectable
- Time-out Timer (TOT)
- Busy channel lockout

## Main indicators/controls

## Main indicators/controls - description

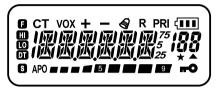

Power/volume on-off	To turn on/off the radio and adjust the volume level.	
Sending indicator	Press the <b>PTT</b> is pressed, it glows to indicate the transmitting status.	
Busy indicator	When the channel is busy, the display shows	
PTT key	When pressed, it enables the transmission.	
MONI (monitor) key	Hold down this key in receiving mode: the channel in use will be monitored. The busy channel indicator will glow.	
Call key	To call your partner	
VFOIMR	To exit the menu and to switch from VFO to Memory mode.	

## Socket and connector

SMA Connector	For connecting the supplied antenna	
Speaker/microphone jack	If you want to use a speaker or a microphone, connect them to this socket. If not, prevent water from dropping into it.	

## **LCD** display

Many icons are shown on the display when the radio is on. The following table can help you to identify each of them.

(111)	Battery level indicator
+/-	Shows the TX offset direction in relation to the RX frequency
HI/IO	Power level indicator (HI=High/LO=Low)
8	Frequency scanning indication
<b></b> O	Keypad lock
o	Displays when DCS is turned on
СТ	CTCSS turned on
vox	VOX turned on
•	Call Function
R	Display reverse frequency
PRI	Priority scan activated
	Received signal strength and TX power
	Frequency in use
188	Function menu
<b>A</b>	The scan finds a signal(open squelch)

## **Basic operations**

#### Supplied antenna

Insert the base of the supplied antenna into the SMA connector and rotate it clockwise. Make sure the antenna has set down. Take out the antenna from the base by rotating it counterclockwise rotation.

## Turn on and off the power

If you want to turn on the power, rotate the **PWR/VOL** knob clockwise until a beep is heard. All icons and frequencies appear on the screen. You can adjust your desired volume by turning the knob.

To turn off the power, rotate the **PWR/VOL** knob counterclockwise rotation. All the icons on the display will disappear and the radio is off

## Adjusting volume

After turning on the radio, rotate the **PWR/VOL** knob clockwise to increase the volume and counter -clockwise to decrease.

## Transmitting/Receiving

Firstly, hold down briefly the **MONI** button to make sure that the frequency is not busy and then press the **PTT**. Speak 4/10cm far from the unit.

The TX indicator lights up.

Release the PTT key to receive.

## **Emergency Alarm**

Hold down the **CALL** key for 1 second and press **MONI**: the radio will switch to emergency alarm.

## Repeater tone

When you press any key, a note at 1750Hz is generated. It gives the possibility to link to repeaters.

## **Keypad Lock**

To Lock or unlock the buttons.

In channel/Frequency mode, press and hold down the key for two seconds. The keypad will lock. Repeat the same procedure to unlock it.

## **Setting Reverse Frequency Function**

This function is possible only when you are linked to a repeater: it permits to invert the TX frequency with the RX frequency. In Channel/Frequency mode, hold down for two seconds until "R" appears on the display. Repeat the same procedure to return to the previous frequency setting.

T#R 5 00

#### Scanning

The Scan version is very useful to monitor the channels before transmitting.

#### 1. Scan all the channels

In Channel/Frequency status, press NENU, STEER and STEER: the radio will scan from the channel in use through all the channels. Whenever any activity is detected, the radio will suspend the scan for 5 seconds. It will then continue to scan unless you press PTT or NEVER key to end scanning.

#### 2. Priority channel scan

In Frequency Mode, press MENU, SEATH, CANTER and SEATH A

## Select scan type

In Frequency mode, press and rotate the **Encoder** until the display shows "**SCAN 13**". Press and turn the **Encoder** knob again to select the scan type (TO/CO/SE). Confirm your selection with the scan type (TO/CO/SE).

#### TO: Time-operated scan

Even though the radio stops on a busy channel, it will continue scanning the other channels.

#### CO: Carrier-operated scan

The radio stops on a busy channel until there is no activity, and then radio begins scanning the other channels.

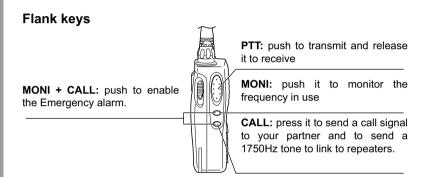

#### SE: Search scan

The radio stops on a busy channel and exits the Scan mode.

#### **DTMF Code**

In Channel/Frequency mode, press PTT and digit a number on the keypad.

#### Select Mode

Hold down extent and turn on the power: the radio can switch between the Channel and Frequency mode. Repeat the procedure to pass to the other mode.

In Frequency mode, press to switch between the Frequency mode and Channel+Frequency mode.

## To store a frequency

To store a frequency and its settings (CTCSS,DCS, SHIFT REPEATERS etc) follow the procedure below:

- 1. at first, choose all the settings to store.
- 2. press the MENU button,
- 3. then, push VFOMR,
- 4. rotate the **Encoder** knob and select the memory number where you want to store the frequency and its settings.
- 5. confirm your selection by pressing (note: a triangle displayed underneath the channel number indicates that it has already been stored).

## **Delete a memory**

#### 1.Delete one stored channel

In Mode turn off the power.

Hold down the way and turn on the unit. "DEL?" and the stored channel number will be displayed. Turn the Encoder knob or select the channel to delete. Push until "YES?" appears on the display; push it again to confirm

ת" כת IEL בי

#### 2. Reset (Delete all the settings in Frequency mode)

Hold down the www button and turn on the unit until "RESET?" is displayed. Press wurtil "VFO?" is shown on the display; push it again for confirmation.

RESETJO

רק מקין"

#### 3. Delete all settings

Hold down well and turn on the unit until "VFO?" is shown on the display. Turn the Encoder knob to select "FULL?", then press enter to delete all the settings in Frequency and VFO modes.

"FULL 7"

## **Advanced Operations**

## Selecting the VOX sensitivity level

The VOX function is deactivated by default. To activate it follow the procedure here below:

- 1. press the MENU button;
- turn the Encoder knob until the display shows 'VOX' (menu 03):
- 3. push the ENTER key;
- turn again the Encoder knob and select the desired VOX level (you can choose amongst 9 different levels);
- 5. push the ENTER key again;
- 6. to exit, press twice VFO/MR.

To activate and select rapidly the VOX function, you can do it also by operating on the fast menu: press the key and then was and follow the procedure above described starting from point 3.

## Setting the transmission power

To select the desired power level:

- 1. press the MENU button:
- 2. turn the **Encoder** knob until '**POW**' (menu 04) is displayed
- 3. push ENTER:
- 4. turn the **Encoder** knob and select the desired power level (you can choose between 2 levels: 'H' ed 'L');
- 5. press ENTER;
- 6. press twice the VFOMR knob to exit.

To activate and select rapidly the power level, you can also use the fast menu: press the key and then and follow the procedure above described starting from point 3.

æ

**....** 

PCW

POW

## Setting squelch

To select the squelch level:

- 1. press the MENU button;
- 2. turn the Encoder knob until 'SQL' (menu 05) is displayed
- 3. push ENTER:
- 4. turn the **Encoder** knob and select the desired squelch level (9 different levels are available);
- 5. press ENTER;
- 6. press twice the veolet knob to exit.

To activate and select rapidly the squelch level, you can also use the fast menu: press the key and then seem and follow the procedure above described starting from point 3.

#### Scrambler on/off

To activate the scrambler, follow this procedure:

- 1. press the MENU button:
- turn the Encoder knob until 'SCRM' (menu 06) is displayed
- 3. push ENTER;
- 4. turn the **Encoder** knob and activate/deactivate the scrambler (ON = activated; OFF = deactivated);
- 5. press ENTER;
- 6. press twice the veolet knob to exit.

To activate/deactivate rapidly this function, you can also use the fast menu: press the wey and then and follow the procedure above described starting from point 3.

## Backlight on/off

To select the LCD backlight:

- 1. press the MENU button:
- 2. turn the Encoder knob until 'LED' (menu 07) is displayed
- 3. push ENTER;
- 4. turn the **Encoder** knob and activate/deactivate the function: 3 different options are available (AUTO, ON, OFF);
- 5. press ENTER:
- 6. press twice the VFOMR knob to exit.

To activate/deactivate rapidly the backlight, you can also use the fast menu: press the wear key and then and follow the procedure above described starting from point 3.

## Select the backlight colour

To select the backlight colour:

- 1. press the MENU button;
- turn the Encoder knob until 'LIGHT' (menu 08) is displayed
- 3. push ENTER:
- turn the Encoder knob and choose the desired colour (3 different colours are available);
- 5. press ENTER;
- 6. press twice the VFOME knob to exit.

To select it rapidly, you can also use the fast menu: press the key and then and follow the procedure above described starting from point 3.

## Beep on/off

The keypad beep is activated by default. To deactivate it:

- 1. press the MENU button;
- 2. turn the Encoder knob until 'BEEP' (menu 09) is displayed
- 3. push ENTER;
- 4. turn the Encoder knob and activate/deactivate the beep (ON = beep enabled; OFF = beep disabled);
- 5. press ENTER:
- 6. press twice the VFOMR knob to exit.

To activate/deactivate the keypad beep, you can use the fast menu: press the keypad beep, you can use the procedure above described starting from point 3.

# Automatic Numbering Identification (ANI) on/off

You can set an automatic number identifier visible from the radio's display of your partner each time you send a call signal. To activate this function:

- 1. press the MENU button;
- 2. turn the **Encoder** knob until 'ANI' (menu 10) is displayed;
- 3. press ENTER;
- 4. rotate the **Encoder** knob and activate/deactivate the function ON = activated, OFF = deactivated:
- 5. push ENTER again;
- 6. press twice VFOIMR to exit.

To activate/deactivate the keypad beep, you can also use the fast menu: press the wew key and then and follow the procedure above described starting from point 3.

# Repeater shift (for communications through repeaters)

To select this function, follow these steps:

- 1. press the MENU button:
- 2. rotate the Encoder knob until 'S-D' (menu 19) is displayed;
- 3. press ENTER;
- 4. turn the **Encoder** knob and select the repeater shift. You can choose amongst the following options +, and 0;
- 5. press ENTER again;

EN

∏F-F-

an

6. press twice to exit

To select the repeater shift you can use the fast menu: press the week key and then and follow the procedure above described starting from point 3.

# Repeater shift adjustment (for communications through repeaters)

- 1. press the MENU button;
- turn the Encoder knob until 'DIFFR' (menu 15) is displayed
- 3. push ENTER;
- turn the Encoder knob and select the repeater shift. You can also enable it by digiting the frequency directly on the keypad.
- 5. press ENTER:

## \_d[FFR7**~15**

#### Select the frequency step

- 1. press the MENU button;
- 2. turn the Encoder knob until 'STEP' (menu 20) is displayed
- 3. push ENTER;
- turn the Encoder knob and select the desired frequency step. You can choose amongst: 5 KHz, 10 KHz, 6.25 KHz, 12.5 KHz and 25 KHz;
- 5. press twice the VEOME knob to exit

## 51EP ---

#### Select the CTCSS and DCS tones

#### To select a CTCSS tone

- 1. press the MENU button:
- turn the Encoder knob until 'C-CDC' (menu 16) is displayed
- 3. push ENTER:
- 4. turn the **Encoder** knob and select the desired subaudio tone;
- 5. press ENTER to confirm.

#### To select a DCS tone:

- select 'C-CDC' (menu 16) either with the Encoder knob or with the fast access;
- 2. Press ENTER
- 3. Press the \*LOCK button:
- 4. turn the **Encoder** knob and select the desired DCS level;

5. press ENTER again for confirmation.

While selecting the DCS codes, if you press , you will select the normal (N) or inverted (I) DCS codes.

## Voice function (only in English)

With this function, you activate a voice that informs about any operation/selection you are doing. To activate it, follow these steps:

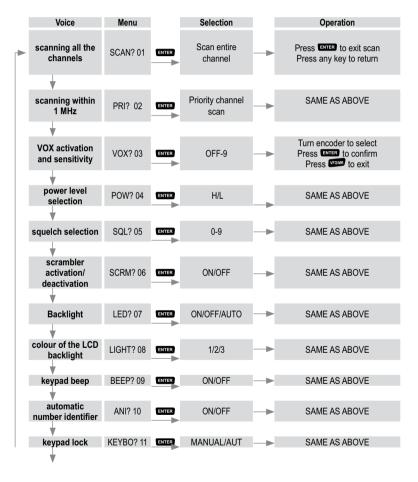

- 1. press the MENU button;
- turn the Encoder knob until 'VOICE' (menu 14) is displayed;
- 3. push ENTER;
- 4. turn the **Encoder** knob and activate/deactivate the function. (ON = enabled; OFF = disabled);
- 5. Push ENTER again;
- 6. press twice the VFOMR knob to exit.

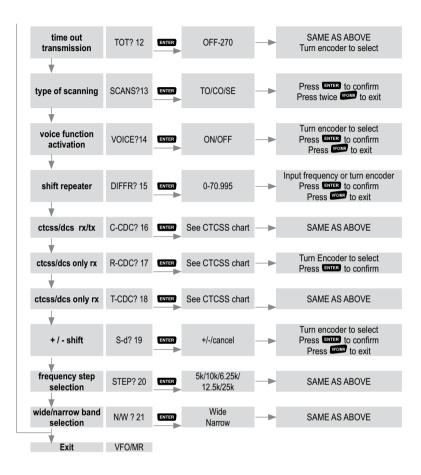

## **Menu Operation**

To operate with all the parts/settings of the menu, you have to follow these general steps:

- 1 Press the MENU button.
- 2 Turn the **Encoder** knob to select the desired menu.
- 3 Press enter and turn the **Encoder** knob to choose the desired setting.
- 4 Press ENTER to confirm.

**Note:** parts from 16 to 21 are available only in Frequency mode.

In Channel mode only parts from 1 to 15 are active.

To pass rapidly from Frequency to Channel mode or vice versa, switch on the unit and hold down the witch.

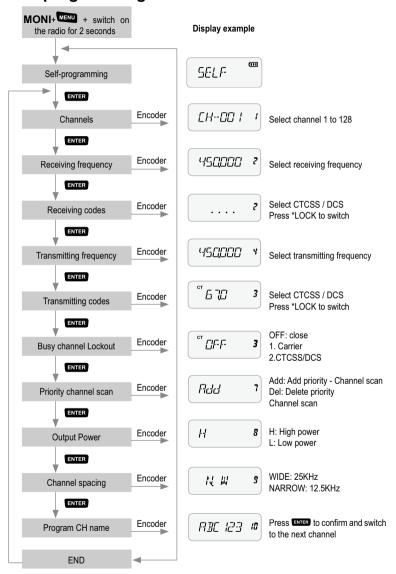

NAME	ON/OFF	Turn encoder to select Press ENTER to confirm
		Press VFOINT to exit

## **Self-Programming mode**

To enter in Self-Programming mode, follow these steps:

- 1. while turning on the unit, hold down 'MONI' and until 'SELF' is displayed;
- 2. press ENTER;
- 3. turn the **Encoder** knob and select the memory number to program:
- 4. push ENTER again;
- 5. digit the desired rx frequency;
- 6. press ENTER;
- press and with the Encoder knob select the desired CTCSS in RX (if you press it again, you can select a DCS code);
- 8. press ENTER;
- 9. digit the desired tx frequency;
- 10. push ENTER:
- 11. press and with the **Encoder** knob select the desired CTCSS in TX (if you press it again, you can select a DCS code);
- 12. press ENTER:
- 13. with the **Encoder** knob, enable/disable the busy channel lockout (you can choose: OFF, 1 carrier, 2 CTCSS/DCS);
- 14. press ENTER;
- 15. by turning the **Encoder** knob, you can enable/disable the priority channel scanning;
- 16. press ENTER;
- 17. turn the **Encoder** knob and select the power level in tx H (high) or L (low);
- 18. press ENTER:
- turn the Encoder knob and select the transmission mode: WIDE or NARROW;
- 20. push ENTER;
- 21. rotate the **Encoder** knob and select the first letter for the name of the programmed channel. To switch to the next channel, push the button and turn the **Encoder** knob;
- 22. press ENTER:
- 23. switch off the unit to finish the programming procedure and return to the standard modality.

## **Self-programming chart**

# **Technical specifications**

## General

Frequency Range	CT200: 144-146MHz; CT400: 430-440MHz
Working Temperate	-20°-+50°
• '	
Operating Voltage	DC 7.4V
Operate Mode	Simplex or Semi-duplex
Dimension	100mm×58mm×33mm (Antenna excluded)
Weight	203g (Including battery)
Antenna impedance	50Ω
Duty cycle	5/5/90
Transmitter	
Frequency Stability	±2.5PPM
Output Power	≤4W
Max Frequency Deviation	≥5KHz
Audio Distortion	≤3%
Adjacent Channel Power	Within European legal terms
Spurious Radiation	Within European legal terms
Occupied Bandwidth	Within European legal terms
Receiver	
RF Sensitivity	<0.2µV
Audio Distortion	≤3%
Audio Response	300Hz ÷ 3KHz
Adjacent Channel Selectivity	Within European legal terms
Intermodulation Rejection	Within European legal terms
Spurious Response	Within European legal terms
Blocking	Within European legal terms

# Troubleshooting guide

Problem	Solution
No Power	The battery pack may be dead. Recharge or replace it.
	The battery pack may not be installed correctly. Remove it and install it again.
Battery power dies shortly after charging	The battery pack life is finished. Replace the battery pack with a new one.
Cannot talk to or hear other members in your group	Make sure you are using the same frequency and CTCSS/DCS tone as the other members in your group.
	Other group members may be too far away. Make sure you are within the range of the other radios.
Other voices (besides group members) are present on the channel.	Change the CTCSS/DCS tone.
	Be sure to change the tone on all radios in your group.
